As we step into this first academic year filled with hope and dreams of scaling new heights, I wish to reiterate the importance of few things that we have to keep in mind. Parents should remember that children should not be forced, but should be guided to achieve whatever goals they may have in their minds in an easy and pleasing manner, so that we may be able to discover the particular touch of genius in each one of them. The purpose of education is to teach our children to think and develop a capacity to reason out facts. Students should keep in mind the importance of planning and prioritizing their time and the effective use of it which are essential to achieve success.
